

**“SHORT” SCAT SURVEY FORM – SHORELINE TROPICAL**

1. GENERAL INFORMATION					
Date: (dd/mm/yyyy)		Location:		Weather:	Sun / Clouds / Fog / Rain / Snow
Time Start: (24hr EST)		Segment ID:		Tide Height:	H / M / L Rising / Falling
Time End: 24hr (EST)		Operations Division:		Survey by:	Foot / ATV / Boat / Helicopter / Overlook
2. SURVEY TEAM # _____					
Name	Organization	Name	Organization		
3. SEGMENT DATA					
Total Length:	_____ meters	Length Surveyed:	_____ meters	Datum:	
Survey Start GPS:	WP: _____	LAT:	_____	LONG:	_____
Survey End GPS:	WP: _____	LAT:	_____	LONG:	_____
4. SHORELINE INFORMATION <i>Select only one primary (P) oiled shoreline type and any secondary (S) - circle if multiple choices</i>					
	Shoreline Type		Coastal Character		
Physical	Slope	<5° / 5-30° / >30°	Slope	<5° / 5-30° / >30°	
Bedrock	Platform / Ramp / Cliff		Platform / Ramp / Cliff		
Unconsolidated	Bank / Cliff / Talus		Bank / Cliff / Talus		
Beach / Flats	Mud		Beach		
	Sand		Dune		
	Mixed Fine		Forest / Jungle		
	Mixed Coarse		Grass/Shrubs		
	Pebble - Cobble		Agricultural Fields		
	Boulder / Rubble		Tidal Channel / Inlet		
	Organics		Lagoon / River		
Wetlands	Marsh		Estuary / Wetlands / Delta		
	Mangrove		Marsh - Mangrove		
Manmade	Permeable		Permeable		
	Impermeable		Impermeable		
5. OPERATIONAL FEATURES					
Debris?	Y / N	Oiled?	Y / N	Debris Amount	_____ bags or _____ trucks
Direct backshore access?	Y / N				
Suitable backshore staging?	Y / N	Alongshore access from next segment?	Y / N	Access restrictions/nearshore coral _____	
6. ZONE ID _____ <i>Description of Oil Conditions in Supra / Upper / Mid / Lower Intertidal Zone (circle one)</i>					
Oil Band	Surface Oil Distribution	Surface Oil Thickness	Surface Oil Type	Subsurface Oil	
Width x Length: _____ m x _____ m	<1 %	Film	Fresh Liquid	Penetration	Burial
Start Waypoint #: _____	1 – 10 %	Stain	Mousse	< 1 cm	Clean layer (above): _____ cm - _____ cm
End waypoint #: _____	11 – 50 %	Coat	Tar Balls	1 – 5 cm	Oiled layer: _____ cm - _____ cm
Sediment type(s): _____	51 – 90 %	Cover	Tar Patties	5 – 10 cm	
_____	91 – 100 %	Thick	Asphalt Pavement	> 10 cm	Clean below? Y / N
_____	_____ %	_____ cm	Other _____	_____ cm	
7. ZONE ID _____ <i>Description of Oil Conditions in Supra / Upper / Mid / Lower Intertidal Zone (circle one)</i>					
Oil Band	Surface Oil Distribution	Surface Oil Thickness	Surface Oil Type	Subsurface Oil	
Width x Length: _____ m x _____ m	<1 %	Film	Fresh Liquid	Penetration	Burial
Start Waypoint #: _____	1 – 10 %	Stain	Mousse	< 1 cm	Clean layer (above): _____ cm - _____ cm
End waypoint #: _____	11 – 50 %	Coat	Tar Balls	1 – 5 cm	Oiled layer: _____ cm - _____ cm
Sediment type(s): _____	51 – 90 %	Cover	Tar Patties	5 – 10 cm	
_____	91 – 100 %	Thick	Asphalt Pavement	> 10 cm	Clean below? Y / N
_____	_____ %	_____ cm	Other _____	_____ cm	
8. COMMENTS (cleanup recommendations, ecological/human use issues and constraints, wildlife observations)					
(for ALL subsegments record: sub-segment ID, length, length surveyed, and GPS start/end points)					
Sketch? Yes / No	Photos? Yes / No (# _____ - _____)	Completed By:
